Core Competencies

Data Cleaning & Preprocessing

Dashboard & Reporting

Statistical Analysis

Exploratory Data Analysis (EDA)

Data Visualization & Reporting

Python for Data Automation

Problem Solving

Communication & Storytelling

Technical Skills

Programming Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (Basic), RegEx, Web Scraping (BeautifulSoup)

Machine Learning & NLP: Scikit-learn, VADER, TextBlob, Word2Vec (Basic Level), Topic Modeling

Visualization & BI Tools: Power BI (DAX), Excel (Pivot Tables, Charts), Seaborn, Matplotlib

Automation & Deployment: Streamlit, FastAPI, Git, Jupyter Notebook

Tools & Platforms: GitHub, Kaggle, CBS Finnacle, Microsoft Excel, Word, PowerPoint, Canva

Education

- 2023 - Present
M.Sc. in Data Science
Amity University, Noida
CGPA: 9.13 (till 3rd SEM)
- 2017 - 2020
B.Sc. in Maths, Statistics, Physics
Banasthali Vidyapith
CGPA: 7.6

Profile Summary

- Data Analyst professional with Hands-On Experience:** Experienced in working on cybersecurity, financial analytics, and real-time data reporting through internships and self-initiated projects, showcasing the ability to solve real-world data problems across domains.
- Cybersecurity & Fraud Analytics:** Supported cyber fraud investigations by analyzing national complaint datasets, detecting fraud patterns, and creating Excel-based dashboards to assist law enforcement.
- Proven Ability to Develop Impactful Data Solutions:** Designed and implemented data-driven systems such as fraud response automation and stock market analytics.
- Passionate About Data-Driven Decision Making:** Strong focus on data cleanliness, automation, and extracting meaningful, actionable insights from complex datasets to support strategic decisions.
- Growth-Driven Mindset:** Known for an explorer's mindset, collaborative approach, and continuous learning attitude in AI, data analytics, and impactful storytelling.

Work Experience

Dec'24 – Feb'25 | **Cyber Fraud Data Analyst Intern** | [I4C, Ministry of Home Affairs](#)

- Analyzed NCRP portal **data** to detect fraud patterns in UPI, e-wallets, and CBDC.
- Prepare **reports** and built **trends** to identify ATM withdrawal hotspots and fraud-prone zones.
- Applied NLP and RegEx on complaint data to **extract geospatial and linguistic patterns**.
- Collaborated** with telecom service providers and law enforcement to block fraudulent numbers.

Mar'24 | **Data Science Intern** | [British Airways](#)

- Scraped 10K+ customer reviews using **BeautifulSoup** and applied **sentiment analysis** (VADER, TextBlob).
- Built a **Random Forest model** to predict customer holiday purchase intent.
- Visualized insights using **Seaborn** and **Matplotlib** for customer feedback trends and actionable reporting.

Projects

Fraud Intelligence & Response Automation (FIRA) | Python, Excel, Power BI:

- Developed a **real-time complaint tracking and fraud escalation system** using Python and Excel.
- Reduced fraud response lag by **40%** and improved tracking transparency.

National Stock Exchange Data Analysis | Python, Streamlit, Kaggle API

- Designed a **self-service BI platform** using **Streamlit** for analyzing stock performances on **NSE India**, providing real-time data insights.
- Published a Kaggle dataset covering major Indian stocks (TCS, HDFC, Reliance, etc.), achieving a high usability score of 8.82

Certificate and Courses

- Azure Fundamentals** (Microsoft) - course
- Introduction to Git and GitHub** (Google) - course
- Essentials of Data Science with R – Probability and Statistical Inference** (IIT Kanpur) - certificate
- Everyday Excel** (University of Colorado Boulder) - course
